

# Experiment 4 — SimHash Deduplication: GPU Resource Savings with Stable Performance

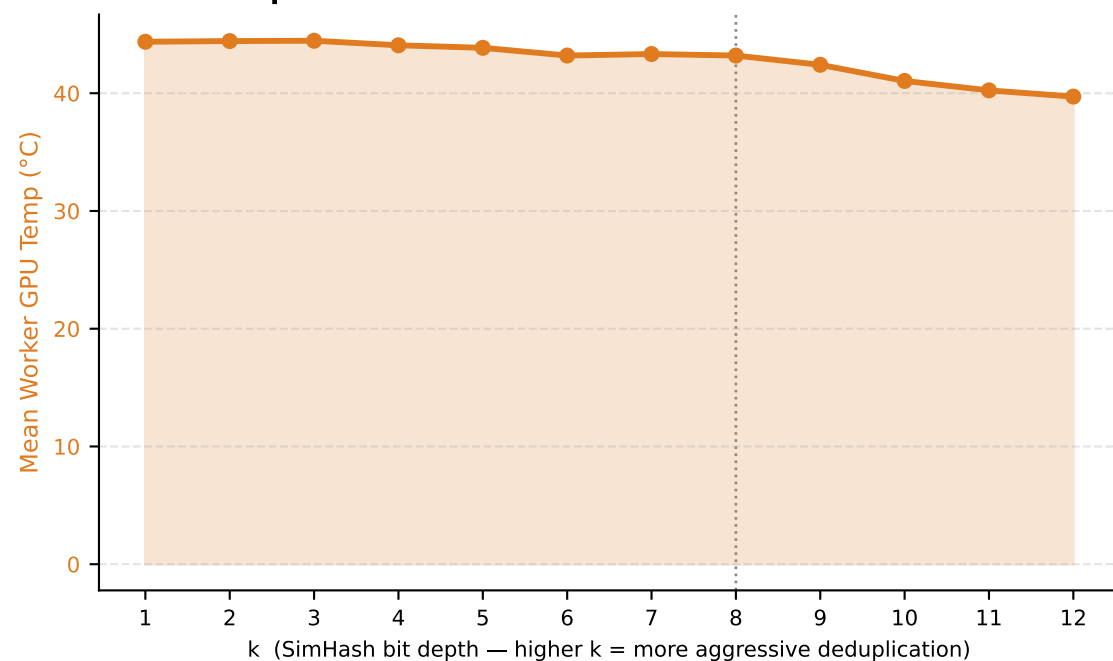

## A Worker GPU Memory vs. OOD F1

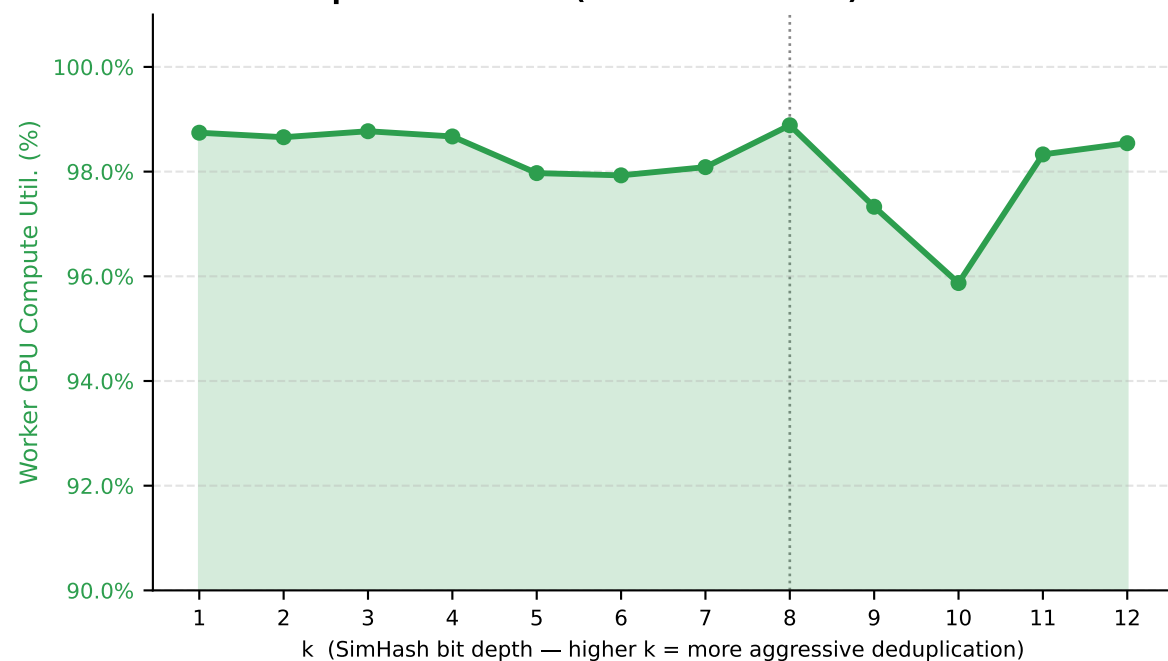

## B Power Draw vs. OOD F1

## C GPU Temperature

## D GPU Compute Utilization (consistent $\geq 96\%$ )

Worker GPU memory (GB)    Temperature ( $^{\circ}$ C)    OOD F1 score (mean  $\pm$  1 SD)  
Power draw (W)    GPU compute util. (%)     $k=8$  (sweet spot)
